

Title: Senior Detailer - idX Toronto

Company Information:

idX is the leading custom fixture and millwork manufacturer in the world. With facilities strategically located throughout North America and operations expanding globally into Asia and Europe, idX is helping companies such as Charles Schwab, Discovery Channel, Levi's, Marriott, Michael Kors, Microsoft, Nike, Ralph Lauren, Starbucks and Tommy Hilfiger achieve their brand vision.

Our mission is to differentiate idX from the competition by offering the economic and operational benefits of an international company while servicing the customer like an entrepreneur. idX has the expertise to integrate multiple materials including wood, metal, glass, laminates and veneer into outstanding retail environments. With personalized attention, extensive capabilities and a focus solely on fixturing and millwork, idX continues to deliver passionate service and exceptional quality products to our customers.

idX Toronto is Canada's leading manufacturer of custom store fixtures. By leveraging extensive metal and wood manufacturing, idX Toronto delivers focused project management providing a superior level of service. Located just north of Toronto, our state of the art facility is over 250,000 square feet with approximately 250 employees.

Description:

The candidate's responsibilities will include:

- Provide detail drawings, and comprehensive bills of material
- Liaison with our Production Team, in order to maximize our manufacturing
- Tailor drawings and bills of material to utilize our manufacturing facilities to their utmost
- Utilize our ERP system (Vantage) to drive standardization in the BOM process, and to facilitate design intent to the Production team
- Work either independently or as part of a team, as needed, to achieve success while maintaining schedules
- Other responsibilities as needed to ensure business goals are met

Qualifications:

The candidate's qualifications will include:

- 5-10 years experience of wood and/or metal manufacture in the store fixture industry
- Technical post-secondary education and/or equivalent experience
- Process Engineering or Detailing background either on an engineering level or a production level.
- Strong AutoCAD or Inventor skills and experience in the creation of drawings of wood and metal store fixtures
- Computer literacy with knowledge of MRP/ERP
- Proven ability to work with Microsoft Office
- Demonstrated hands-on shop floor experience in either metal or wood manufacture
- Highly effective communication and interpersonal skills
